#### **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

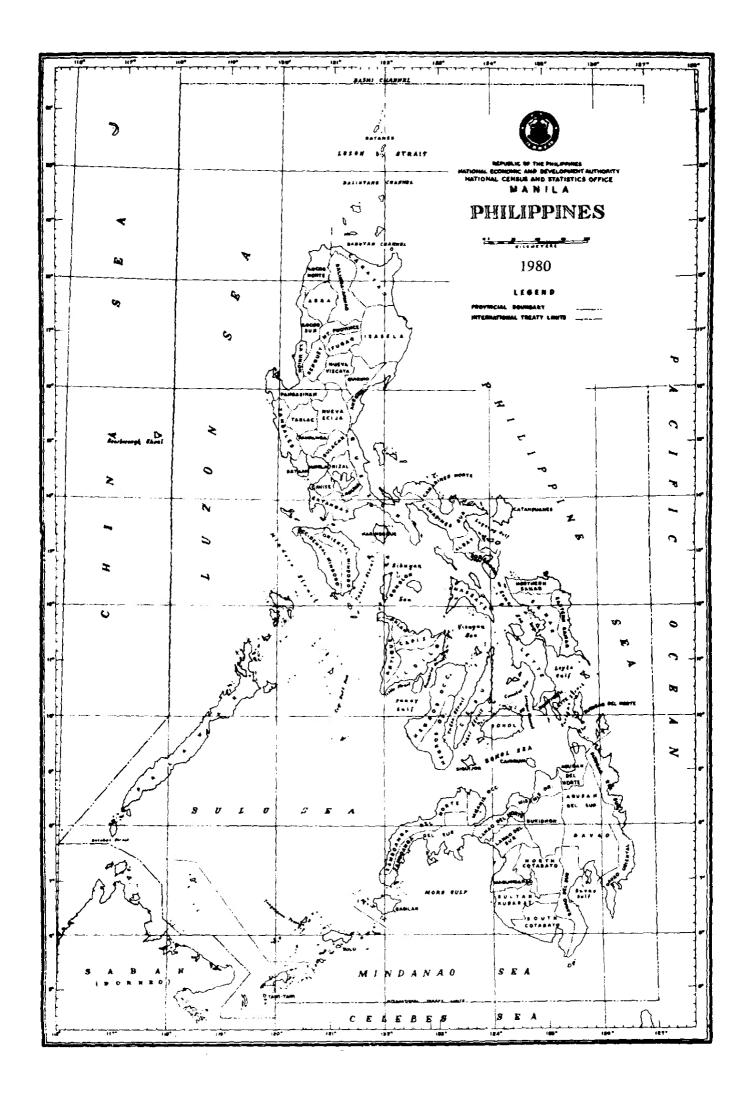

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

## **Explanatory Text**

#### **GENERAL**

#### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

## INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

#### **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

## **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

## METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

## PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

#### POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

## CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the	Tenure of Owner-Occupant with Respect
Household	to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

## **DEFINITION OF TERMS AND CONCEPTS**

#### I - POPULATION

## **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

#### **URBAN AND RURAL AREAS**

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

#### PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
   (2) in mental hospitals;
   (3) in leprosaria or leper colonies; and
   (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months:
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

#### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

#### PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

#### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

## LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

#### RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

#### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

#### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

#### **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

## LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

## **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

## **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

#### BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

#### The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
  - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
  - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
  - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

#### DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

#### CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

#### CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

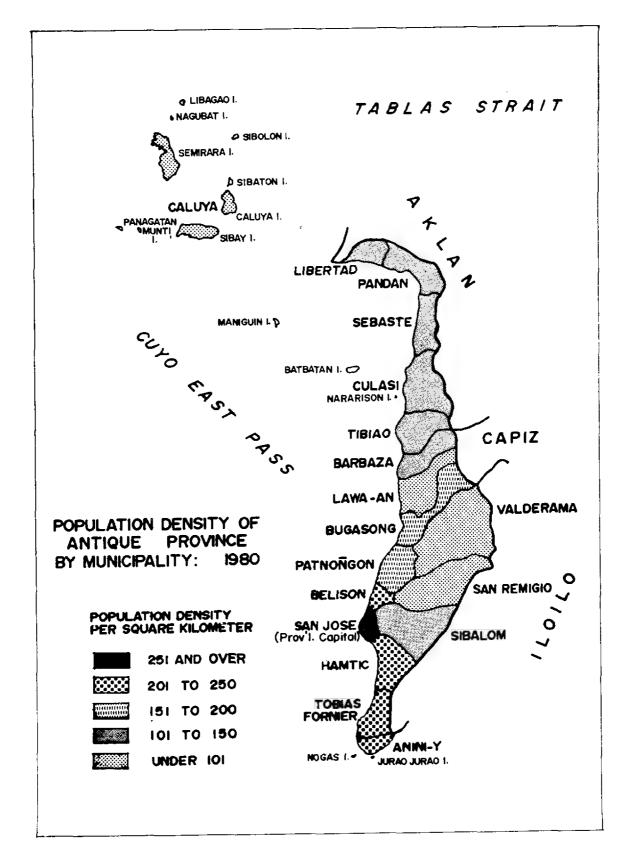

#### NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

#### FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

## **Antique: A Brief Analysis**

Antique, a narrow strip of land stretching along the entire west coast of Panay Island, is bounded by Aklan on the north and northeast, Capiz on the east, Iloilo on the south and southeast and the Cuyo East Pass on the west. A mountain range which curves northwest to southwest separates the province from Aklan, Capiz and Iloilo. Spurs from the mountain range descend closely to the coast, resulting in a narrow coastline receding west to the Cuyo East Pass.

Resembling a seahorse in shape, Antique is 155 kilometers long and 35 kilometers at its widest point. About 80 percent of the province consist of mountains. The only large area of lowlands is the Sibalom River Valley where the municipalities of Sibalom and San Remigio are located. Despite the rugged terrain and narrow coastal plains, however, much of Antique's area is suited for agriculture. Cultivated land constitutes 42.18 percent of its total land area. The province is rich in metallic and non-metallic deposits. Coal is being mined in Semirara, an island barangay of Caluya. Considerable deposits of manganese, nickel, gold, silver and marble are also found in the province.

One of four provinces composing the island of Panay, Antique has a land area of 2,522 square kilometers which is only 0.84 percent of the total land area of the country and 12.57 percent of the Western Visayas Region.

The province is composed of 18 municipalities, 14 of which are along the coast; three are inland municipalities and one is made up of six small islands. San Jose serves as the provincial capital.

#### **POPULATION**

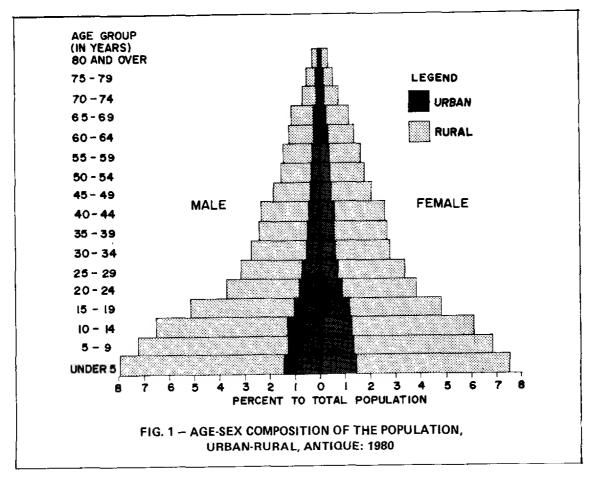

As recorded on May 1, 1980, the population of Antique was 344,879 (males – 173,079; females – 171,800). Population density of the province moved up from 122.3 persons per square kilometer in 1975 to 136.7, 41st in rank among the 73 provinces. The population figure also put the annual geometric growth rate of the population since May 1, 1975 at 2.26 percent, an increase of 0.96 percentage point over the 1970-1975 rate of 1.30 percent.

Urban dwellers, whose annual growth rate increased considerably from 0.79 percent between 1970 and 1975 to 11.22 percent between 1975 and 1980, brought about the latest round of population growth acceleration. Meanwhile, the rural population experienced a corresponding decline in its growth rate, from 1.38 percent to 0.52 percent. As a result, the proportion of the rural population decreased from 86.43 to 79.35 percent while the urban proportion went up from 13.57 to 20.65 percent. The proportion of rural-based males and females declined respectively to 40.14 percent and 39.21 percent.

A BRIEF ANALYSIS

TABLE A — URBAN-RURAL POPULATION BY SEX, ANTIQUE: 1970, 1975 AND 1980

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	344,879	100.00	308,484	100.00	289,172	100.00
Male	173,079	50.19	155,436	50.39	140,622	48.63
Female	171,800	49.81	153,048	49.61	148,550	51.37
Urban	71,230	20.65	41,864	13.57	40,247	13.92
Male	34,661	10.05	20,278	6.57	18,505	6.40
Female	36,569	10.60	21,586	7.00	21,742	7.52
Rural	273,649	79.35	266,620	86.43	248,925	86.08
Male	138,418	40.14	135,158	43.82	122,117	42.23
Female	135,231	39.21	131,462	42.61	126,808	43.85

The sex ratio (number of males per 100 females) of the population in general experienced a negligible increase, from 101.56 in 1975 to 100.74, with the males retaining their predominance over the females.

From the group of persons under 5 years of age to the 80 years old and above, the rural male and female population separately lessen as each age group becomes older. In contrast, the urban male and female population deviate from the usual pyramid formation. Among the males, the 5-9 years old are outnumbered by those 10-14 years of age and those aged 70-74, by the 75-79 age group. On the other hand, urban females aged 40-44 exceed those belonging to the 35-39 age group (Table 2).

#### AGE COMPOSITION

Persons under 15 years of age make up 42.15 percent of the total population or a decline of 1.78 and 1.93 percentage points, respectively, from the 1975 and 1970 figures. Correspondingly, the proportion of persons in the productive age group (15-64 years) has been in the upward swing. After rising 0.22 percentage point between 1970 and 1975, it increased further by 0.83 percent to 52.52 percent. Adults 65 years old and over comprise 5.33 percent compared with 4.38 percent in 1975 and 4.45 percent in 1970.

Below are comparative figures showing the age composition of the population in three censal years:

TABLE B — AGE COMPOSITION OF THE POPULATION, ANTIQUE: 1970, 1975 AND 1980

Age Composition	198	1980 1975		1975		1970	
	Number	Percent	Number	Percent	Number	Percent	
Total	344,879	100.00	308,484	100.00	289,172	100.Q0	
0 – 14 years	145,381	42.15	135,516	43.93	127,458	44.08	
15 – 64 years	181,120	52.52	159,470	51.69	148,851	51.47	
65 years and over	18,378	5.33	13,498	4.38	12,863	4.45	

Of the total urban population 39.04 percent are under 15 years of age, 54.93 percent belong to the productive age group and 6.03 percent are at least 65 years old. Comparatively, 42.97 percent of the rural residents are 0-14 years old; 51.89 percent, 15-64 years and 5.14 percent, 65 years and over.

The median age of the population is a year higher, from 17 years in 1975 to 18 years in 1980.

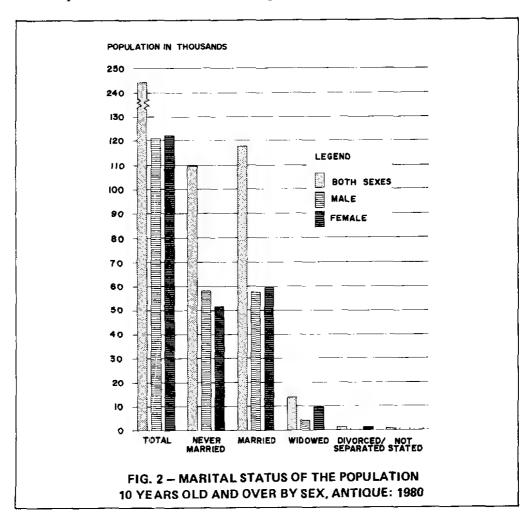

Due to a slight increase in the proportion of persons belonging to the productive age group, the dependency ratio (number of dependents for every 100 persons in the productive age group) dropped from 93.44 dependents to 90.41. Urban dependency ratio was markedly lower than the rural ratio, 82.04 for the former and 92.72 for the latter (Table 3).

## **MARITAL STATUS**

Married persons consistently increased in number (from 44.61% in 1970 to 46.48% in 1975), making up 48.41 percent of the total population 10 years old and over. Never

married persons, on the other hand, sustained a downward trend despite a 5.49 percent increase in their total or from 104,148 individuals in 1975 to 109,868 in 1980. Widowed and divorced or separated persons increased proportionally, covering up for their proportionate losses in 1975. The proportion of widowed persons decreased by 0.83 percentage point in 1975 then rose to 5.74 percent, a negligible increase of 0.88 percentage point. That of the divorced or separated followed the same pattern, 0.42 percent in 1970 to 0.31 percent in 1975, moving up to 0.50 percent in the last census. Those who did not disclose their marital status more than tripled their 1975 level, but constituted only 0.15 percent.

Never married males totalled 48.22 percent of all males 10 years old and over, 3.15 percentage points lower than the 1975 proportion. Married males reached 48.03 percent after an increase of 0.55 percentage point between 1970-1975 and an increase of 2.55 percentage points between 1975-1980. Widowed and divorced or separated males increased respectively to 3.41 and 0.26 percent. Among the females, 42.22 percent were single following a decrease of 3.03 percentage points. Married females rose from 47.49 percent in 1975 to 48.79 percent; the widowed, from 6.77 to 8.04 percent and the divorced or separated, from 0.43 to 0.74 percent. More females than males did not disclose their marital status – 0.21 percent for the former and 0.08 percent for the latter.

Shown in the succeeding table is the classification of the population 10 years old and over by sex and marital status:

TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, ANTIQUE: 1970, 1975 AND 1980

Sex and	19	80	1975		19	70
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	243,079	100.00	215,590	100.00	202,055	100.00
Never married	109,868	45.20	104,148	48.31	99,369	49.18
Married	117,679	48.41	100,213	46.48	90,132	44.61
Widowed	13,957	5.74	10,483	4.86	11,506	5.69
Divorced/separated	1,223	0.50	660	0.31	857	0.42
Not stated	352	0.15	86	0.04	191	0.10
Male	120,682	100.00	107,786	100.00	97,036	100.00
Never married	58,193	48.22	55,372	51.37	49,865	51.39
Married	57,957	48.03	49,018	45.48	43,602	44.93
Widowed	4,118	3.41	3,180	2.95	3,323	3.43

Not stated	254	0.21	70	0.06	139	0.13

### HIGHEST GRADE COMPLETED

Over three-fifths (63.42%) of the private household population 7 years old and over had an elementary education or a decrease of 3.72 percentage points from the 1975 proportion. Those schooled up to the secondary level increased by 3.49 percentage points to 16.91 percent. Persons with college education likewise moved up by 1.92 percentage points to 4.80 percent and academic degree holders, by 0.65 percentage point to 3.19 percent. Meanwhile, those who had no formal education dropped from 12.12 percent in 1975 to 11.51 percent and those who did not reveal their educational attainment, from 1.90 to 0.17 percent.

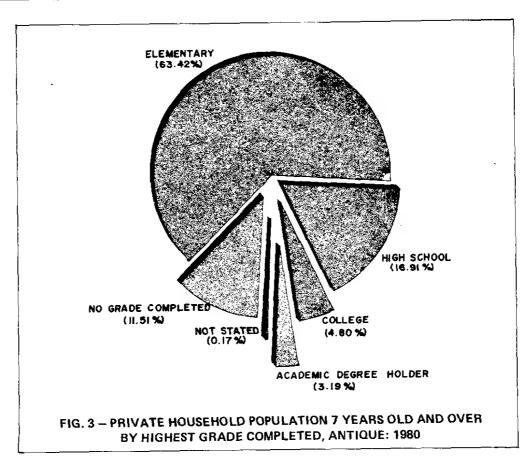

Of those with elementary training, 34.93 percent did not go beyond third grade; 21.61 percent finished at most the fourth grade; 12.58 percent, fifth grade and 30.88 percent, the sixth or seventh grade. Nearly two-thirds or 66.02 percent of those who reached the secondary level completed anywhere from the first to third year while 33.98 percent

graduated from fourth year. Majority of those who went on to college finished the first to third year (86.91%) and only 13.09 percent, fourth year or higher (Table 5).

The following table shows the distribution of the private household population seven years old and over according to highest grade completed in the last two censal years:

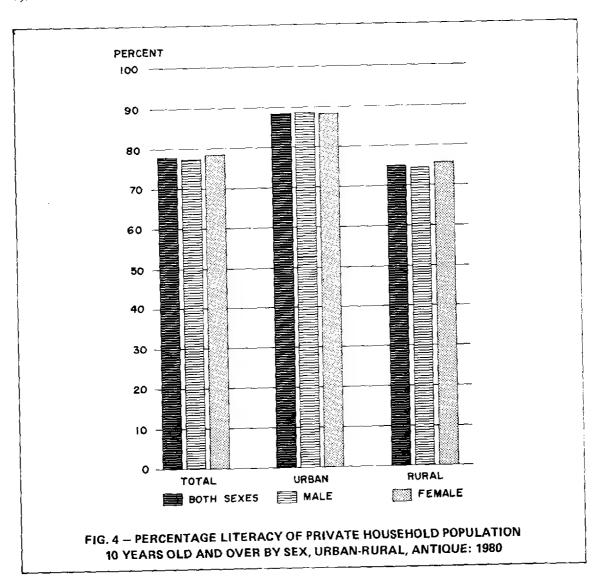

TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, ANTIQUE: 1975 AND 1980

Highest Grade Completed	19	80	1975		
	Number	Percent	Number	Percent	
Total	271,929	100.00	<u>242,675</u>	100.00	
No grade completed	31,295	11.51	29,409	12.12	
Elementary	172,460	63.42	162,923	67.14	
High school	45,978	16.91	32,578	13.42	
College	13,059	4.80	6,996	2.88	
Academic degree holder	8,671	3.19	6,152	2.54	
Not stated	466	0.17	4,617	1.90	

#### LITERACY

For the private household population 10 years old and over, the literacy rate was 77.84 percent, a very slight increase of 0.31 percentage point over the 1970 proportion. The urban areas had a higher proportion of literate persons than the rural areas, 88.25 percent for the former and 75.00 percent for the latter. This could be attributed to having more schools in the urban than in the rural areas. Males and females alike turned out more or less equal literacy rates -77.26 percent for the males and 78.41 percent for the opposite sex (Table 6).

## LANGUAGE OR DIALECT

Of the 23 languages and dialects reported in the province, Hamtikanon is the most widely spoken in all municipalities, except in Caluya where almost three-fourths (74.13%) of the private households speak Cuyono Hamtikanon is generally spoken in 62,032 private households or 96.56 percent of all private households in the province. The rest speak

Cuyono (2.16%), Hiligaynon or Ilongo (0.29%), Aklanon (0.26%), Tagalog (0.19%) and one of several other languages and dialects (0.54%) reported for the province. In urban areas 97.88 percent of the private households speak Hamtikanon and in the rural areas, 96.23 percent (Table 7).

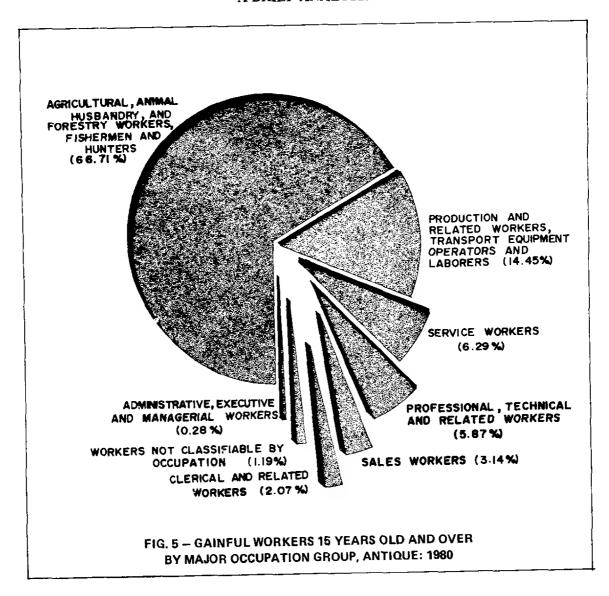

#### GAINFUL OCCUPATION

Out of 199,234 persons 15 years old and over 98,319 are gainfully employed, compared with 79,209 in 1975. Although declining by 5.14 percentage points, agricultural, animal husbandry and forestry workers, fishermen and hunters remain the largest group, making up over two-thirds of 66.71 percent of the total gainful workers in Antique. Production and related workers, transport equipment operators and laborers likewise retained its second position with an increase of 2.99 percentage points. Moving up from fourth to third place, service workers increased from 5.38 to 6.29 percent. Professional, technical and related workers, at 5.87 percent, moved down from third to fourth place despite a 0.45 percentage-point increase in their proportion. Sales workers declined to 3.14 percent while clerical and related workers and workers not classifiable by occupation increased to 2.07 and 1.19 percent, respectively. At merely 0.28 percent, administrative, executive and managerial workers constitute the smallest group of gainful workers (Table 8).

The following table reflects changes in the proportion of workers engaged in various gainful occupations between 1975 and 1980:

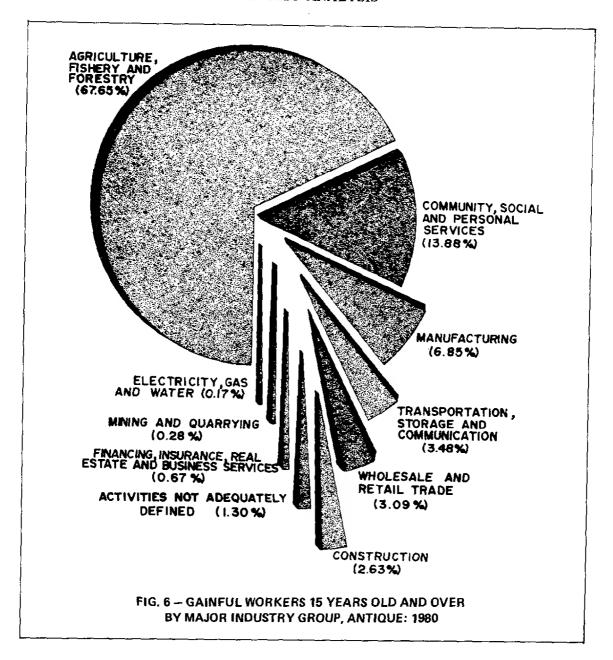

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, ANTIQUE: 1975 AND 1980

Major	19	80	1975		
Occupation Group	Number	Percent	Number	Percent	
Total	98,319	100.00	<u>79,209</u>	100.00	
Professional, technical and related					
workers	5,775	5.87	4,293	5.42	
Administrative, executive and					
managerial workers	274	0.28	487	0.61	
Clerical and related workers	2,035	2.07	1,146	1.45	
Sales workers	3,092	3.14	2,676	3.38	
Service workers	6,189	6.29	4,262	5.38	
Agricultural, animal husbandry and forestry workers, fishermen	ŕ				
and hunters	65,584	66.71	56,913	71.85	
Production and related workers, transport equipment operators	,				
and laborers	14,205	14.45	9,074	11.46	
Workers not classifiable by occupation	1,165	1.19	358	0.45	

#### **INDUSTRY**

Agriculture, fishery and forestry, the dominant industry group, provide work to over two-thirds (67.65%) of the total gainful workers 15 years old and over. Agricultural crop producers chiefly comprise the group (87.66%), followed by the fishery workers (10.42%). Community, social and personal services, making up 13.88 percent, rank as the next biggest employer. The three leading sources of jobs in this group are personal and household services (40.24%), education services (31.68%) and public administration and defense (18.32%). The manufacturing industry accommodates no more than 6.85 percent of the total gainful workers with the manufacture of textile, wearing apparel and leather (74.12%) as their principal concentration. Only 3.48 percent are into transportation, storage and communication. Wholesale and retail trade make up 3.09 percent; construction, 2.63 percent; financing, insurance, real estate and business services, 0.67 percent; mining and quarrying, 0.28 percent and electricity, gas and water, 0.17 percent. Activities not adequately defined account for 1.30 percent (Table 9).

#### **MIGRATION**

Persons whose place of residence on May 1, 1980 was the same as that on May 1, 1975 comprised 96.00 percent of the total population 5 years old and over. Of the 11,647 migrants, 29.74 percent lived in another municipality of the same province; 67.43 percent moved across provincial boundaries and 2.83 percent resided in foreign countries. Of those who moved across provincial boundaries (inter-provincial migrants) 51.22 percent were females and 48.78 percent were males. Similarly, a higher proportion of the intra-provincial migrants were females (52.69%) than males (47.31%). The same pattern was observed among migrants from foreign countries; 45.59 percent were males and 54.41 percent, females (Table 10).

## TYPE OF BUILDING

Almost all (99.24%) of the households occupy single houses. The rest, an aggregate of 488 households or 0.76 percent, live either in duplex (0.23%), apartment/accesoria/condominium/row house (0.02%), improvised structures such as barong-barong (0.32%), or in commercial/industrial/agricultural buildings (0.16%). Households occupying other housing units, hotel, lodging house and the like and other collective living quarters constitute 0.01 percent each.

Majority of the households occupying single houses are in the rural areas (80.06%); only 19.94 percent are in urban areas. Similarly, a greater proportion of households living in duplex (65.07%), apartment, accesoria, etc. (66.67%) and in improvised structures (71.29%) are rural dwellers. No household was reported occupying other housing units (natural shelter, boat, etc.), hotel, lodging house, dormitory and other collective living quarters (military camp, etc.) in the urban areas which means that such structures are entirely occupied by rural households. On the other hand, 95.15 percent of the households residing in commercial/industrial/agricultural buildings are urban-based and only 4.85 percent, rural households. Institutional buildings are left unoccupied by both urban and rural households (Table 1).

A comparative study of the 1970 and 1980 figures below reveals a marked improvement in the housing conditions in Antique. In 1970, 96.64 percent of the 51,565 households lived in single houses and 2.92 percent, in improvised structures. A decade later, only 0.32 percent of the total households occupy improvised houses, thus increasing the proportion of single houses to 99.24 percent.

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, ANTIQUE: 1970 AND 1980

	198	30	1970		
Type of Building	Number	Percent	Number	Percent	
Total	64,238	100.00	51,565	100.00	
Single house Duplex	63,750 146	99.24 0.23	49,834 108	96.64 0.21	
Apartment/accesoria/condominium/ row house/etc. Improvised (barong-barong) Commercial/industrial/agricultural	15 209 103	0.02 0.32 0.16	27 1,507 82	0.05 2.92 0.16	
Other housing unit: natural shelter, boat, etc. Hotel, lodging house, dormitory, etc.	5 5	0.01 0.01	_ _	<u>-</u>	
Institutional (hospital, convent, school dormitory, etc.) Other collective living quarters	_	_	7	0.02	
(military camp, etc.)	5	0.01			

## TYPE OF OCCUPANCY

Ninety-four percent (93.99%) of the total households own the dwelling units they occupy. The rest are either tenant/lessee (1.62%), subtenant/sublessee (0.14%) or rent-free occupants (4.25%). In both urban and rural areas a large majority of the households are owner-occupants -89.75 percent and 95.06 percent, respectively (Table 1).

## CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Almost three-fourths (74.76%) of the 64,238 households live in dwelling units constructed with roof of cogon or nipa. One-fifth or 20.58 percent dwell in units with roof of galvanized iron/aluminum and 4.10 percent, of other materials such as anahaw. Very few households live in units with roof of tile, concrete, brick or stone (0.33%), asbestos (0.03%) or makeshift/salvaged materials (0.20%).

Households occupying dwelling units with roof of cogon or nipa constitute 66.03 percent in urban and 76.96 percent in rural areas. Urban households in units roofed with galvanized iron/aluminum compose 28.41 percent and rural households, 18.60 percent.

As to construction materials of outer walls, 65.55 percent of the total households occupy dwelling units with walls of bamboo or sawali; 15.36 percent reside in units with outer walls built of cogon or nipa; 8.12 percent, of mixed tile, concrete, brick, stone and wood or plywood; 6.88 percent, of wood or plywood; 1.90 percent, of tile, concrete, brick or stone and 1.55 percent, of other materials such as anahaw. Less than one percent (0.64%) occupy units with walls of galvanized iron, aluminum, asbestos and makeshift or salvaged materials. Both the urban and rural households have a marked preference for dwelling units walled with bamboo or sawali, 49.92 percent for the former and 69.49 percent for the latter (Table 2).

#### YEAR BUILT

Newly-built dwelling units or units erected between 1976-1980 are occupied by 43.21 percent of the total households. Nearly one-fourth or 24.59 percent live in units constructed during 1971-1975; 20.40 percent, 1961-1970 and 8.40 percent, 1951-1960. Only 2.27 percent occupy structures built during 1942-1950 and 1.13 percent, 1941 or earlier (Table 2).

#### FLOOR AREA OF DWELLING UNIT

More than half of the households (55.08%) have less than 30 square meters of floor area for their dwelling units. Less than one-third (31.77%) live in 30-49 square-meter dwelling units; 6.94 percent, 50-69 square meters and 3.49 percent, 70-99 square meters. Only 2.72 percent have spacious dwelling units with floor area ranging from 100 to 300 square meters and over (Table 2).

## TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 60,380 households in owner-occupied dwelling units, more than three-fourths (75.85%) also own the land where the structures are erected. The rest of the households are either lessee or sublessee (5.16%), farm lessee or agricultural tenant of landowner (4.97%), of other legal tenure (4.65%) or no tenure such as squatters (9.37%). (See Table 4.)

## KIND OF LIGHTING FACILITIES

A great majority of the households still use kerosene (90.45%) for lighting although the proportion has declined by 7.14 percentage points since 1970. Users of electricity increased by 6.43 percentage points to 8.02 percent. Households using liquefied petroleum gas (LPG) make up only 1.34 percent; oil, 0.07 percent and other kinds, 0.12 percent. Kerosene is widely used among urban (76.37%) and rural households (93.99%). Also, a higher proportion of households in urban than in rural areas use electricity – 22.74 percent compared to 4.31 percent. Liquefied petroleum gas is used by 1.51 percent of the rural households and only 0.66 percent of the urban households (Table 5).

## SOURCE AND USE OF WATER SUPPLY

Three main sources of water supply for drinking, kitchen use and washing clothes are provided by tubed or piped shallow wells, spring and tubed or piped deep wells. Of the total households 23.43 percent obtain their drinking water from tubed or piped shallow well; 21.56 percent, from spring; 20.65 percent, from tubed or piped deep well; 16.09 percent, faucet, community water system; 13.62 percent, dug well and 4.64 percent, from lake, river, stream, etc. Nearly the same proportions of households obtain their water supply for kitchen use from these sources: 23.39 percent, tubed or piped shallow well; 20.96 percent, spring; 20.31 percent, tubed or piped deep well; 15.34 percent, dug well; 14.88 percent, faucet community water system and 5.09 percent, lake, river, stream, etc. For washing clothes 20.56 percent depend on tubed or piped shallow well; 18.35 percent, tubed or piped deep well; 17.33 percent, spring; 17.04 percent, lake, river, stream, etc.; 14.19 percent, dug well and 12.51 percent, faucet, community water system. Rain water is hardly used at all – 0.01 percent for drinking, 0.03 percent for kitchen use and 0.02 percent for washing clothes (Table 6).

Among the urban households the tubed or piped deep well is a common source of water supply for drinking (35.52%), for kitchen use (35.05%) and for washing clothes (32.79%). Water from tubed or piped shallow well is used by 23.91 percent, 23.68 percent and 23.01 percent, respectively, followed by the faucet community water system with 23.17 percent, 21.55 percent and 19.45 percent for the respective uses.

On the other hand, a higher proportion of households in rural areas rely on spring as a source of water supply for drinking (26.06%), for kitchen use (25.48%) and for laundering clothes (20.89%). Other main sources are tubed or piped shallow well (23.31%, 23.31% and 19.94%, respectively), tubed or piped deep well (16.91%, 16.60% and 14.72%, repectively) and dug well (13.95%, 15.40% and 14.01%, respectively). The faucet, community water system also provides water for drinking to 14.30 percent; for kitchen use, 13.20 percent and for laundry use, 10.76 percent. About one-fifth (19.66%) of the rural households utilize water from lake, river, stream and the like for laundry purposes (Table 6).

## **COOKING FUEL**

Wood or charcoal is used as cooking fuel by majority of the households (90.85%) in Antique. The remaining 9.15 percent use either kerosene (5.98%), liquefied petroleum gas (0.67%), electricity (0.17%) or other kinds (2.33%). In both urban and rural areas, the predominant use of wood or charcoal is observed (86.59% of the total urban households and 91.93% of the total rural households). The proportion of households using kerosene slightly varies between the two areas -5.54 percent for the former and 6.09 percent for the latter.

However, more urban (1.85%) than rural households (0.37%) use liquefied petroleum gas (Table 8).

Compared to cooking facilities of households during the past decade, users of wood or charcoal dropped by 4.45 percentage points while kerosene users went up by 4.37 percentage points. Increase in the proportion of households using electricity is negligible, 0.13 percentage point. A negligible decrease of 0.05 percentage point is observed for liquefied petroleum gas users.

## TOILET FACILITIES

As seen in Table 7, 30.94 percent of the households use the closed pit (antipolo, etc.) type of toilet facility; 24.32 percent use the open pit; 14.60 percent, the water-sealed other depository type; 5.71 percent, water-sealed sewer or septic tank and 1.17 percent, other types (pail system, etc.). Over one-fifth, or 23.26 percent of the total households lack toilet facilities.

Urban households have better toilet facilities than their rural counterparts. Almost thirty percent (29.87%) of the urban households use water-sealed other depository; 27.91 percent, closed pit; 18.51 percent, open pit; 12.86 percent, water-sealed sewer or septic tank and 1.02 percent, other types. Among the rural households, 31.70 percent use the closed pit; 25.79 percent, the open pit; 10.75 percent, water-sealed other depository; 3.91 percent, water-sealed sewer or septic tank and 1.21 percent, other types. Households without toilet facilities constitute 9.83 percent in urban areas and 26.64 percent in rural areas.

## OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Less than half (47.09%) of the households in Antique own radios; 1.73 percent own television sets while 2.08 percent have refrigerators or freezers. Of the 12,924 urban households 61.28 percent own radios; 5.75 percent have television sets and 6.62 percent, refrigerators or freezers. Among the rural households 43.51 percent have radios. However, only a small percentage own television sets (0.72%) and refrigerators or freezers (0.94%).

As far as household appliances are concerned, the standard of living of most households has greatly improved within a span of ten years. Ownership of radios increased by 20.08 percentage points; television sets, 1.66 percentage points and refrigerators or freezers, 1.67 percentage points. Considerable increases are noted in the ownership of these appliances among urban households -14.87 percentage points for radios, 5.53 percentage points for television sets and 4.43 percentage points for refrigerators or freezers. For the rural areas a marked increase of 19.44 percentage points is observed for households with radios. For those with television sets and refrigerators or freezers, however, the increases are negligible -0.67 and 0.80 percentage points, respectively (Table 9).
